

Verification of Compliance

Facility Name: _____ **Street/Rural Address:** _____

Municipality: _____ **Permit #:** _____

Permit Applicants are required to submit a *Verification of Compliance* (VoC) to the ASCA upon completion of the petroleum tank installation project. A VoC is confirmation that the construction was completed as applied for. Confirmation is accepted from any of the related parties listed below. Please choose one or more of the options below and complete or have completed as required. The VoC can be emailed (ascatanks@safetycodes.ab.ca) or faxed (780-424-5134) to the Council office.

- An inspection performed by the engineer involved in the project design.
"I certify that the construction completed under this Permit was completed in accordance with the approved design and the National Fire Code – 2019 Alberta Edition.."

Print Name of Engineer	Engineering Company Name
Date of Inspection	Signature

- Certified contractor assigned to the project.
"I certify that the construction completed under this Permit was completed in accordance with the approved design and the National Fire Code – 2019 Alberta Edition.."

Print Name of Certified Contractor	Company Name
Date of Inspection	Signature

- Third Party Inspection Services (ie. engineering firm contracted by the tank manufacturer to ensure the tank installation complies with manufacturer's instructions).
- *Please attach inspection reports as provided.*

Print Name of Inspector	Company Name
Date of Inspection	Signature

- Where an aboveground tank installation did not involve a certified contractor in accordance with Fire Code Interpretation 08-05 (where the tank system does not require piping, etc., at the time of installation) the owner or representative of the owner, *"certifies that the construction completed under this Permit was completed in accordance with the approved design and the Alberta Fire Code"*.

Print Name of Owner or Owner's Representative	Date of Inspection	Signature
